

Second Language Research Methods

英語教學研究方法

Summer 2011

Prof. Ming-chung Yu

余明忠 教授

Course Description

The purpose of this course is to introduce a clear and comprehensive overview of linguistic research methods in applied linguistics. The course is aimed at those who are new to studies in the field of language learning or who may have done or written some research work without academic guidance. Specific focus is on how to help education researchers and classroom teachers understand and critique published studies in applied linguistics. After completing this course, students are expected to have become interested enough to delve further into the literature and maybe even to embark on research of their own.

Required Course Books

Nunan, David. *Research Methods in Language Learning*, 10th printing. Cambridge University Press, 2001.

Brown, H. Douglas, and Susan Gonzo. *Readings on Second Language Acquisition*. London: Prentice Hall, 1995.

Course Requirements

Grade for the course will be computed as follows: (i) exam: 60%, (ii) oral presentation: 20%, and (iii) class participation: 20%
